

SLEEVINGS,  
TUBES & PROFILES

Since 1983, PLASTUB has acquired expertise in the manufacture of sleeves, tubes, bundled tubing and profiles in flexible plastics, silicone elastomers and other special materials.

PLASTUB proposes a wide range of high-performance products covering a vast array of applications in highly diverse industries, such as household appliances, cabling, paramedical, agriculture, cars and industrial vehicles, petrochemicals, cosmetics, pharmaceuticals, railway construction, chemistry, electromechanics, electro-thermal engineering etc. Varnished, impregnated and treated braided insulating sleeves, fire-retardant sleeves and diverse industrial braids extend the range even further.

PLASTUB is part of  
the OMERIN Group.

### Men and women at your service

The technical expertise of our teams is at your disposal, providing responses and solutions to all your requirements.

Our Methods, Quality and Research and Development Departments work permanently together with the aim of constantly improving our products and processes.

All our staff subscribe to this approach with their involvement and constant self-checking at all stages of production.

This catalogue is the result of the passionate endeavours of an entire team, who have displayed great talent in writing it for you. It is designed to be a simple and concise working tool for you, serving as a reference document that is able to meet the majority of your needs.

For further information about our products and their applications, project designs or non-binding quotations, simply contact our sales department at +33 (0)473 824 436 or by e-mail to [plastub@omerin.com](mailto:plastub@omerin.com)

# Plastub

## Technical expertise

All our products are designed and developed in our engineering office and lab, through the technical expertise of our engineers.

We use test equipment to validate the physical, chemical, mechanical, electrical and fire-retardant behaviours of the sleeves, tubes and profiles that we manufacture.

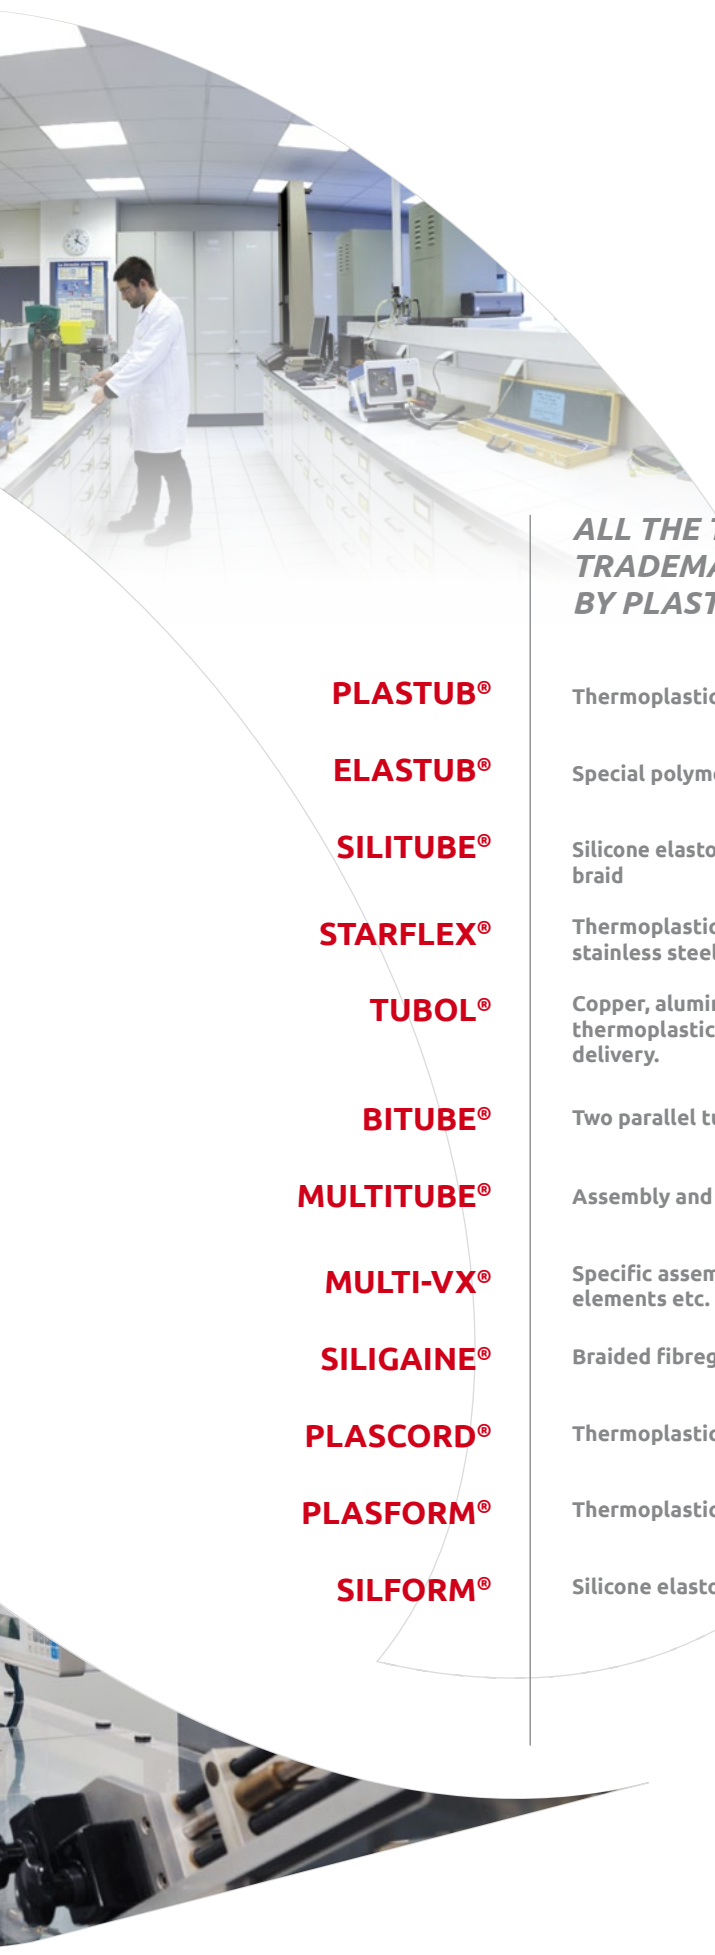

Our products are subject to a vast array of tests to guarantee a high level of quality and satisfy the most stringent standards.

ISO 9001: 2015

BUREAU VERITAS  
Certification

**ALL THE TRADEMARKS LISTED BELOW ARE  
TRADEMARKS REGISTERED OR USED  
BY PLASTUB S.A.S.**

<b>PLASTUB®</b>	Thermoplastic extruded sleeveings and tubes
<b>ELASTUB®</b>	Special polymer extruded sleeveings and tubes
<b>SILITUBE®</b>	Silicone elastomer extruded sleeveings and tubes, with or without reinforcing braid
<b>STARFLEX®</b>	Thermoplastic or special polymer extruded tubes with textile, galvanised or stainless steel reinforcing braid.
<b>TUBOL®</b>	Copper, aluminium, thermoplastic or special polymer tubes, with thermoplastic sheaths, with or without reinforcing braid, for compressed air delivery.
<b>BITUBE®</b>	Two parallel tubes assembled with outer sheath for compressed air delivery.
<b>MULTITUBE®</b>	Assembly and outer sheath of tube-rods for compressed air delivery.
<b>MULTI-VX®</b>	Specific assembly concept and design of different tube, electrical cable elements etc.
<b>SILIGAIN®</b>	Braided fibreglass or textile thread sleeveings, with or without coating.
<b>PLASCORD®</b>	Thermoplastic or special polymer extruded rods and cords.
<b>PLASFORM®</b>	Thermoplastic or special polymer extruded profiles.
<b>SILFORM®</b>	Silicone elastomer extruded rods and profiles.

## PLASTUB® PVC120

PVC tube 55 Shore A  
Food grade translucent

### Description

Polyvinyl chloride extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Various industries, agriculture, laboratories, paramedical, oxygen therapy etc.

### General characteristics

- Extra flexible, economic, versatile
- Good resistance to acids, bases and detergents
- Recyclable

### Technical data

- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -30 to +50°C
- Nominal hardness: **55 Shore A** as per ISO R 868
- Nominal density: 1.17 as per ISO 1183
  - Tensile strength: >10 Mpa as per ISO R 527
  - Elongation at break: >360 % as per ISO R 527
  - Standard colour: translucent
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
  - Surface marking
- Additives: Anti-UV, antibacterial etc.
  - Pre-cut rolls
  - Pre-split versions

## PLASTUB® PVC21

PVC tube 67 Shore A  
Translucent

### Description

Polyvinyl chloride extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Various industries, agriculture, laboratories, oxygen therapy etc.

### General characteristics

- Extra flexible, economic, versatile
  - Good resistance to acids, bases and detergents
  - Recyclable
  - Phthalate-free

### Technical data

- Temperature of use: -30 to +50°C
- Nominal hardness: **67 Shore A** as per ISO R 868
- Nominal density: 1.20 as per ISO 1183
  - Tensile strength: >12 Mpa as per ISO R 527
  - Elongation at break: >250 % as per ISO R 527
  - Standard colour: translucent
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
  - Other packaging
  - Surface marking
- Additives: Anti-UV, antibacterial etc.

## PLASTUB® PVC23

PVC tube 79 Shore A  
Food grade crystal

### Description

Polyvinyl chloride extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Various industries, agriculture, laboratories, aquariums etc.

### General characteristics

- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
  - Recyclable
  - Phthalate-free

### Technical data

- Tube approved for food contact as per the specifications of standard NF EN 1186 as well as European regulations 1935/2004 and 10/2011.
    - Temperature of use: -30 to +50°C
    - Nominal hardness: **79 Shore A** as per ISO R 868
  - Nominal density: 1.24 as per ISO 1183
    - Tensile strength: >17 Mpa as per ISO R 527
    - Elongation at break: >280 % as per ISO R 527
    - Standard colour: crystal
  - Recommended connection: nipple with lug clamp or band clamp
- Options (contact us)**
- Other diameters
  - Other solid colours
    - Cut to lengths
  - Other packaging
  - Surface marking
  - Additives: Anti-UV, antibacterial etc.
    - Pre-cut rolls
    - Pre-split versions
    - Braided versions

## PLASTUB® PVC24

PVC tube 84 Shore A  
Crystal

### Description

Polyvinyl chloride extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Various industries, agriculture, laboratories, aquariums etc.

### General characteristics

- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
  - Recyclable
  - Phtalate-free

### Technical data

- Temperature of use: -30 to +50°C
- Nominal hardness: **84 Shore A** as per ISO R 868
- Nominal density: 1.25 as per ISO 1183
  - Tensile strength: >17 Mpa as per ISO R 527
  - Elongation at break: >280 % as per ISO R 527
  - Standard colour: crystal
  - Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
  - Surface marking
- Additives: Anti-UV, antibacterial etc.
  - Pre-cut rolls
  - Pre-split versions
  - Braided versions

## PLASTUB® PVC33

PVC tube 70 Shore A  
Opaque

### Description

Polyvinyl chloride extruded tube

### Applications

Unpressurised transport of fluids  
Disposable media

### Fields

Miscellaneous industries, irrigation etc.

### General characteristics

- Economic, good weather resistance
- Recyclable

### Technical data

- Temperature of use: -30 to +50°C
- Nominal hardness: **70 Shore A**  
as per ISO R 868
- Nominal density: 1.46 as per ISO 1183
  - Tensile strength: >11 Mpa  
as per ISO R 527
  - Elongation at break: >250 %  
as per ISO R 527
  - Standard colour: opaque
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
  - Surface marking
- Additives: Anti-UV, antibacterial etc.
  - Pre-cut rolls

## PLASTUB® PVC42

### PVC/NBR tube 74 Shore A Black

#### Description

Polyvinyl chloride and nitrile rubber extruded tube

#### Applications

Unpressurised transport of air, fluids

#### Fields

Unpressurised transfer and backflow of certain hydrocarbons

#### General characteristics

- Good weather resistance, improved resistance to hydrocarbons
- Recyclable

#### Technical data

- Temperature of use: -30 to +50°C
- Nominal hardness: **74 Shore A** as per ISO R 868
- Nominal density: 1.29 as per ISO 1183
  - Tensile strength: >15 Mpa as per ISO R 527
  - Elongation at break: >320 % as per ISO R 527
  - Standard colour: black
- Recommended connection: nipple with lug clamp or band clamp

#### Options (contact us)

- Other diameters
- Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.
- Pre-cut rolls

## PLASTUB® PVC29 BUL

PVC bulb tube  
68 Shore A  
Food grade crystal

### Description

Polyvinyl chloride extruded bulb tube with variable diameter

### Applications

Unpressurised transport of air, fluids

### Fields

Oxygen therapy, laboratory

### General characteristics

- Flexible, economic, versatile
- Used to connect two elements with different cross sections
- Good resistance to acids, bases and detergents
- Recyclable

### Technical data

- Standard: Material suitable for food contact under certain conditions
  - Standard interval: 1 m
- Temperature of use: -30°C to +50°C
  - Nominal hardness: **68 Shore A** as per ISO R 868
- Nominal density: 1.20 as per ISO 1183
  - Tensile strength: >17 Mpa as per ISO R 527
  - Elongation at break: >280 % as per ISO R 527
  - Standard colour: crystal
  - Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.

## PLASTUB® CPU

CPU tube 55 Shore D / 80°C  
Blue

### Description

Polyurethane copolymer extruded and calibrated tube

### Applications

Pressurised transport of compressed air, gas, lubricant

### Fields

Maintenance, control, process, instrumentation

### General characteristics

- Calibrated tube
- Alternative to PA and PU
  - Small bending radius
  - Good UV resistance
- Good hydrocarbon resistance

### Technical data

- Temperature of use: -40 to +80°C
- Nominal hardness: **55 Shore D**
  - Nominal density: 1,15
  - Standard colour: blue
- Peak temperature: +100°C
- Recommended connection: quick-fit connector

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Sheathed versions

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging

## PLASTUB® PU98

PU tube 98 Shore A / 60°C  
Translucent

### Description

Polyester-base polyurethane extruded and calibrated tube

### Applications

Pressurised transport of compressed air, gas, lubricant

### Fields

Maintenance, control, process, instrumentation

### General characteristics

- Good resistance to abrasion.
  - Calibrated tube
- Small bending radius
- Good UV resistance
- Good hydrocarbon resistance

### Technical data

- Temperature of use: **-30°C to +60°C**
- Nominal hardness: **98 Shore A** as per DIN 53505
- Nominal density: 1.22 as per DIN 53479
  - Tensile strength: >50 Mpa as per DIN 53504 S2
  - Elongation at break: >550 % as per DIN 53504
- Standard colour: translucent
  - Peak temperature: **+80°C**
- Recommended connection: quick-fit connector

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Sheathed versions

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging

## PLASTUB® PA

PA tube 62 Shore D / 100°C  
Translucent

### Description

Polyamide extruded and calibrated tube

### Applications

Pressurised transport of compressed air, lubricant

### Fields

Maintenance, control, process, instrumentation

### General characteristics

- Calibrated tube
- Good impact resistance
- Good alternate bending strength.
- Good UV resistance
- Good hydrocarbon resistance

### Technical data

- Standard: Tube approved as per DIN 74324-1 and DIN 73378
- Temperature of use: **-40 to +100°C**
- Nominal hardness: **62 Shore D** as per ISO R 868
- Nominal density: 1.02 as per ISO 1183
- Tensile strength: >20 Mpa as per ISO R 527
- Elongation at break: >200 % as per ISO R 527
- Standard colour: translucent
- Peak temperature: **+120°C**
- Recommended connection: quick-fit connector

### Options (contact us)

- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Sheathed versions
- Braided versions

**PLASTUB® PA ATEX**  
PA tube 63 Shore D / 100°C  
Opaque

**Description**

Antistatic polyamide  
extruded and calibrated tube

**Applications**

Pressurised transport of  
compressed air, lubricant in ATEX environment

**Fields**

Maintenance, control, process,  
instrumentation, petrochemicals

**General characteristics**

- Calibrated tube
- Antistatic tube
- Good UV resistance
- Good hydrocarbon resistance

**Technical data**

- Standard: ATEX Sector II G/D
  - Surface resistivity:  $10^6 \Omega$   
as per IEC 62631
- Temperature of use: **-40 to +100°C**
  - Nominal hardness: **63 Shore D**  
as per ISO R 868
- Nominal density: 1.25 as per ISO 1183
  - Tensile strength: >16 Mpa  
as per ISO R 527
  - Elongation at break: >300 %  
as per ISO R 527
    - Standard colour: opaque

## PLASTUB® PAR

PA tube 72 Shore D / 100°C  
Translucent

### Description

Rigid polyamide  
extruded and calibrated tube

### Applications

Pressurised transport of  
compressed air, lubricants  
Spraying, greasing

### Fields

Maintenance, control, process,  
instrumentation

### General characteristics

- Calibrated tube
- Improved resistance to pressure

### Technical data

- Standard: DIN 73378
- Temperature of use: **-40 to +100°C**
- Nominal hardness: **72 Shore D**  
as per ISO R 868
- Nominal density: 1.03  
as per ISO 1183
- Tensile strength: >52 Mpa  
as per ISO R 527
- Elongation at break: >200 %  
as per ISO R 527
- Standard colour: translucent
- Peak temperature: **+120°C**
- Recommended connection: quick-fit  
connector

### Options (contact us)

## PLASTUB® PEHD

HDPE tube 65 Shore D  
Food grade translucent

### Description

High-density polyethylene extruded tube

### Applications

Pressurised transport of compressed air, chemical products, gas, lubricant

### Fields

Maintenance, control, process, instrumentation

### General characteristics

- Lightweight
- Physiologically inert
- Food grade
- Very good chemical resistance

### Technical data

- Standard: Material suitable for food contact under certain conditions
- Temperature of use: -15 to +50°C
- Nominal hardness: **65 Shore D** as per ISO R 868
- Nominal density: 0.96 as per ISO 1183
  - Tensile strength: >33 Mpa as per ISO R 527
  - Elongation at break: >600 % as per ISO R 527
- Standard colour: translucent
- Recommended connection: compression tube fittings

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
  - Surface marking
- Sheathed versions
  - Braided versions
- Antistatic versions

## ELASTUB® STA55

TPE tube 59 Shore A / 90°C  
Food grade opaque

### Description

SANTOPRENE® type  
polymer extruded tube

### Applications

Peristaltic pumps, doser pumps

### Fields

Medical, agriculture, laboratory, cosmetics

### General characteristics

- Extra flexible
- Excellent resistance to dynamic fatigue, shearing and abrasion
- Low deformation under compression and traction
  - Food grade
  - Excellent weather resistance
  - Very good chemical resistance

### Technical data

- Standard: \* FDA-approved material 21 CFR 177.2600, NSF STANDARD 51
  - Temperature of use: **-40 to +90°C**
    - Nominal hardness: **59 Shore A** as per ISO R 868
    - Nominal density: 0.97 as per ISO R 527
    - Tensile strength: >4.4 Mpa as per ISO 37
  - Elongation at break: >600 % as per ISO 37
    - Standard colour: opaque
    - Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
  - Other packaging

## ELASTUB® STA64

TPE tube 69 Shore A / 90°C  
Food grade opaque

### Description

SANTOPRENE® type  
polymer extruded tube

### Applications

Peristaltic pumps, doser pumps

### Fields

Medical, agriculture, laboratory,  
cosmetics

### General characteristics

- Excellent resistance to dynamic fatigue, shearing and abrasion
- Low deformation under compression and traction
- Food grade
- Excellent weather resistance
- Very good chemical resistance

### Technical data

- Standard: \* FDA-approved material 21 CFR 177.2600, NSF STANDARD 51
  - Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 9/11/1994 as well as European regulations 1935/2004 and 10/2011.
  - Temperature of use: **-40 to +90°C**
  - Nominal hardness: **69 Shore A**  
as per ISO R 868
  - Nominal density: 0.97 as per ISO R 527
  - Tensile strength: >6.9 Mpa as per ISO 37
  - Elongation at break: >400 % as per ISO 37
    - Standard colour: opaque
    - Peak temperature: **+110°C**
  - Recommended connection: nipple with lug clamp or band clamp
- ### Options (contact us)

## ELASTUB® ST73

TPE tube 78 Shore A / 90°C  
Black

### Description

SANTOPRENE® type  
polymer extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Miscellaneous industries, automobile

### General characteristics

- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

### Technical data

- Standard: Approved material UL94 HB thickness 1 mm FMV SS 302 (equiv. NF ISO 3795)
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **78 Shore A** as per ISO R 868
- Nominal density: 0.98 as per ISO R 527
- Tensile strength: >8.3 Mpa as per ISO 37
- Elongation at break: >375 % as per ISO 37
  - Standard colour: black
  - Peak temperature: **+110°C**
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging

## ELASTUB® ST87

TPE tube 93 Shore A / 90°C  
Black

### Description

SANTOPRENE® type  
polymer extruded tube

### Applications

Unpressurised transport of air, fluids

### Fields

Miscellaneous industries, automobile

### General characteristics

- Semi-rigid
- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

### Technical data

- Standard: Approved material UL94 HB  
thickness 1 mm FMV SS 302  
(equiv. NF ISO 3795)
- Temperature of use: **-40 to +90°C**
- Nominal hardness: **93 Shore A**  
as per ISO R 868
- Nominal density: 0.96 as per ISO R 527
- Tensile strength: >15.9 Mpa as per ISO 37
- Elongation at break: >530 % as per ISO 37
  - Standard colour: black
  - Peak temperature: **+110°C**
- Recommended connection: nipple with lug  
clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Braided versions

## ELASTUB® GTS

TPE tube 75 Shore A / 90°C  
Black

### Description

Nitrile polymer extruded tube

### Applications

Unpressurised transfer and backflow of hydrocarbons, oils, greases

### Fields

Miscellaneous industries, automobile

### General characteristics

- Very good hydrocarbon resistance
- Good weather resistance

### Technical data

- Temperature of use: **-40 to +90°C**
- Nominal hardness: **75 Shore A**  
as per ISO R 868
- Nominal density: 1 as per ISO R 527
- Tensile strength: >6.2 Mpa as per ISO 37
- Elongation at break: >265 % as per ISO 37
  - Standard colour: black
  - Peak temperature: **+110°C**
  - Recommended connection:  
nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other packaging
- Braided versions
- Cut to lengths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Nominal thickness (mm)	Nominal linear weight (g/m)	Standard packaging Roll (m)
3	5	1	13	100

## ELASTUB® PTFE

PTFE tube 60 Shore D / 250°C  
Food grade translucent

### Description

Polytetrafluoroethylene extruded tube

### Applications

Pressurised transport of chemically aggressive fluids, gas

### Fields

Medical, pharmaceutical, agriculture, laboratory, cosmetics

### General characteristics

- UV resistance
- Exceptional chemical resistance
- Anti-adhesive
  - Food grade
- Temperature resistance
  - Non-inflammable
  - Fire resistance

### Technical data

- Standard: \* Approved material  
FDA 21 CFR 177.1550
- Temperature of use: **-200 to +250°C**
- Nominal hardness: **60 Shore D**  
as per ISO R 868
- Nominal density: 2.20 as per ISO R 527
  - Tensile strength: ≥25 Mpa  
as per ISO R 527
- Elongation at break: >300 % as per ISO 37
  - Flame resistance UL94 V0
- Standard colour: translucent
- Peak temperature: **+280°C**
- Recommended connection:  
compression tube fittings

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Braided versions
- Sheathed versions
- Antistatic versions

## ELASTUB® PFA

PFA tube 60 Shore D / 260°C  
Food grade crystal

### Description

Perfluoroalkoxy extruded tube

### Applications

Pressurised transport of chemically aggressive fluids

### Fields

Medical, pharmaceutical, agriculture, laboratory, cosmetics

### General characteristics

- Transparency
- Longevity
- UV resistance
- Exceptional chemical resistance
- Anti-adhesive
- Food grade
- Temperature resistance
- Non-inflammable

### Technical data

- Standard: \* Approved material FDA 21 CFR 177.1550
- Temperature of use: **-70 to +260°C**
- Nominal hardness: **60 Shore D** as per ISO R 868
- Nominal density: 2.15 as per ISO R 527
- Elongation at break: >300 % as per ISO 37
  - Standard colour: crystal
  - Peak temperature: **+290°C**
- Recommended connection: compression tube fittings

### Options (contact us)

- Other diameters
- Other solid colours
- Cut to lengths
- Other packaging
- Sheathed versions

**SILITUBE® SI50**

**Silicone tube**  
**50 Shore A / 180°C**  
**Food grade translucent**

**Description**

Peroxide-cured silicone elastomer extruded tube

**Applications**

Unpressurised transport of food grade liquids, alcohols, acids  
 Peristaltic pumps, doser pumps

**Fields**

Medical, pharmaceutical, agriculture, laboratory, cosmetics

**General characteristics**

- Extra flexible and elastic
- Food grade
- Can be sterilised in autoclave
- Resistant to high temperatures
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance, UV
- Water-repellent
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Low deformation under compression and traction

**Technical data**

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **50 Shore A** as per DIN 53505
- Nominal density: 1.14 as per ISO 1183
- Tensile strength: >12 Mpa as per DIN 53504 S1
- Elongation at break: >700 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

## SILITUBE® SI60

**Silicone tube**  
**60 Shore A / 180°C**  
**Food grade translucent**

### Description

Peroxide-cured silicone elastomer extruded tube

### Applications

Unpressurised transport of food grade liquids, alcohols, acids  
Peristaltic pumps, doser pumps

### Fields

Medical, pharmaceutical, agriculture, laboratory, cosmetics

### General characteristics

- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance, UV
- Water-repellent
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Low deformation under compression and traction

### Technical data

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-60 to +180°C**
- Nominal hardness: **60 Shore A** as per DIN 53505
- Nominal density: 1.14 as per ISO 1183
- Tensile strength: >11.5 Mpa as per DIN 53504 S1
- Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

**SILITUBE® SI70**

**Silicone tube  
70 Shore A / 180°C  
Food grade translucent**

**Description**

Peroxide-cured silicone elastomer extruded tube

**Applications**

Unpressurised transport of food grade liquids, alcohols, acids

**Fields**

Medical, pharmaceutical, agriculture, laboratory, cosmetics

**General characteristics**

- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance, UV
- Water-repellent
- Chemically inert and biologically neutral

**Technical data**

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-60 to +180°C**
  - Nominal hardness: **70 Shore A** as per DIN 53505
- Nominal density: 1.19 as per ISO 1183
  - Tensile strength: >10 Mpa as per DIN 53504 S1
  - Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent
  - Peak temperature: **+200°C**
  - Recommended connection: nipple with lug clamp or band clamp

## SILITUBE® SI80

**Silicone tube**  
**80 Shore A / 180°C**  
**Food grade translucent**

### Description

Peroxide-cured silicone elastomer extruded tube

### Applications

Unpressurised transport of food grade liquids, alcohols, acids

### Fields

Medical, pharmaceutical, agriculture, laboratory, cosmetics

### General characteristics

- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Good resistance to aggressive fluids, alcohols and acids
- Excellent weather resistance
- Water-repellent
- Chemically inert and biologically neutral

### Technical data

- Standard: \* FDA-approved material 21 CFR 177.2600, European regulation 1935/2004
  - Temperature of use: **-60 to +180°C**
  - Nominal hardness: **80 Shore A** as per DIN 53505
- Nominal density: 1.20 as per ISO 1183
  - Tensile strength: >10.5 Mpa as per DIN 53504 S1
  - Elongation at break: >280 % as per DIN 53504 S1
- Standard colour: translucent
- Peak temperature: **+200°C**
- Recommended connection: nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths

## SILITUBE® SITEC

Silicone tube  
73 Shore A / 180°C  
Opaque

### Description

Peroxide-cured silicone elastomer  
extruded tube

### Applications

Unpressurised transport of acid liquids

### Fields

Medical, pharmaceutical, agriculture,  
laboratory, cosmetics

### General characteristics

- Non-adhesive
- Resistant to high temperatures
- Good resistance to aggressive fluids,  
alcohols and acids
- Excellent weather resistance
- Water-repellent

### Technical data

- Temperature of use: **-60 to +180°C**
- Nominal hardness: **73 Shore A**  
as per DIN 53505
- Nominal density: 1.45 as per ISO 1183
  - Tensile strength: >6.5 Mpa  
as per DIN 53504 S1
  - Elongation at break: >150 %  
as per DIN 53504 S1
  - Standard colour: opaque
  - Peak temperature: **+200°C**
  - Recommended connection:  
nipple with lug clamp or band clamp

## SILITUBE® SI270

Silicone tube  
70 Shore A / 180°C  
Food grade translucent

### Description

Platinum-cured silicone elastomer  
extruded tube

### Applications

Unpressurised transport of acid liquids

### Fields

Medical, pharmaceutical, agriculture,  
laboratory, cosmetics

### General characteristics

- Resistant to high temperatures
  - Enhanced mechanical properties
  - Good resistance to aggressive fluids,  
alcohols and acids
  - Excellent weather resistance
    - Water-repellent
    - Chemically inert
- and biologically neutral

### Technical data

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
  - Temperature of use: **-60 to +180°C**
  - Nominal hardness: **70 Shore A**  
as per DIN 53505
- Nominal density: 1.19 as per ISO 1183
  - Tensile strength: >11 Mpa  
as per DIN 53504 S1
  - Elongation at break: >600 %  
as per DIN 53504 S1
- Standard colour: translucent
  - Peak temperature: **+200°C**
  - Recommended connection:  
nipple with lug clamp or band clamp

### Options (contact us)

- Other diameters
- Other solid colours

## SILITUBE® SI70TPCC

Silicone tube 70 Shore A with textile braid - food grade

### Description

Silicone elastomer extruded tube, polyester fibre braid, impregnated

### Applications

Pressurised transport of food grade liquids, alcohols, acids, steam

### Fields

Electrical appliances, medical, agriculture

### General characteristics

- Very flexible
- Food grade tube
- Resistance to pressure
- Good resistance to aggressive fluids, steam, alcohols and acids
- Good resistance to dynamic fatigue

### Technical data

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1.9
- Tube approved for food contact as per the specifications of standard NF EN 1186, decree of 25/11/1992 as well as European regulations 1935/2004 and 10/2011.
- Temperature of use: **-40 to +150°C**
  - Recommended connection: nipple with lug clamp or band clamp

# SILICONE ELASTOMER EXTRUDED TUBES, WITH REINFORCING BRAID

# REINFORCED TUBES

## SILITUBE® SITIG

Silicone tube with stainless steel braid

### Description

Silicone elastomer extruded tube, stainless steel wire braid

### Applications

Pressurised transport of chemically aggressive fluids

### Fields

Miscellaneous industries, industrial vehicles

### General characteristics

- Flexible
- Resistance to pressure and temperature
- Improved resistance to hydrocarbon vapours

### Technical data

- Temperature of use: **-60 to +180°C**
  - AISI 304 stainless steel braid
  - Recommended connection: nipple with low-pressure crimping ferrule

### Options (contact us)

- Other diameters
- Other packaging
- Sheathed versions
  - Other braids
- Hoses fitted with crimped connectors
- Other qualities of interior tubes

Nominal internal diameter (mm)	Diameter on braid (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging Roll (m)
4	8	30	42	120	70	100

## STARFLEX® NG

### Nitrile rubber tube with galvanised braid

#### Description

Nitrile rubber extruded tube, galvanised steel wire braid

#### Applications

Pressurised transfer and backflow of hydrocarbons, gases, oils, greases

#### Fields

Miscellaneous industries, automobile, petrochemicals

#### General characteristics

- Very good resistance to hydrocarbons and gases
- Resistance to pressure

#### Technical data

- Temperature of use: **-20 to +90°C**
- Recommended connection: nipple with low-pressure crimping ferrule

#### Precautions for use

- Do not use in humid atmospheres
- Do not heat insulate

#### Options (contact us)

- Other diameters
- Other packaging
- Sheathed versions
  - Other braids
- Hoses fitted with crimped connectors
- Other qualities of interior tubes

Nominal internal diameter (mm)	Diameter on braid (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)	Standard packaging Roll (m)
4	8,3	35	42	127	70	100
6	10,5	40	37	112	80	100
8	12,8	48	37	112	125	100
10	14,8	60	35	106	150	50
12	17,8	72	27	81	200	50

## STARFLEX® EI

EPDM tube with stainless  
steel braid

### Description

EPDM rubber extruded tube,  
stainless steel wire braid

### Applications

Pressurised transport of potable water

### Fields

Miscellaneous industries, sanitary, agriculture

### General characteristics

- Excellent resistance to corrosion and ageing
- Resistance to pressure

### Technical data

- Standard: ACS, WRAS, CSTB
- Temperature of use: **-20 to +90°C**
- AISI 304 stainless steel braid
- Recommended connection: nipple with low-pressure crimping ferrule

## STARFLEX® PTFEI

PTFE tube with stainless steel braid, food grade

### Description

Polytetrafluoroethylene extruded tube, stainless steel wire braid

### Applications

Pressurised transport of chemically aggressive fluids, gas

### Fields

Medical, pharmaceutical, agriculture, laboratory, cosmetics

### General characteristics

- Exceptional chemical resistance
  - Longevity
  - Food grade
- Temperature resistance
- Very good resistance to pressure
  - Steam cleaning possible

### Technical data

- Standard: \* Tube material FDA-approved 21 CFR 177.1550
- Temperature of use: **-200 to +250°C**
  - AISI 304 stainless steel braid
  - Recommended connection: nipple with high-pressure crimping ferrule

### Options (contact us)

- Other diameters
- Other packaging

## TUBOL® PAP PA tube with PVC sheath

### Description

Polyamide extruded and calibrated tube,  
polyvinyl chloride sheath

### Applications

Pressurised transport of  
compressed air, lubricant

### Fields

Maintenance, control, process,  
instrumentation

### General characteristics

- Sparkproof sheath
- Calibrated internal tube
- Good resistance to impacts and abrasion
- Very good UV resistance

### Technical data

- Standard: Internal tube approved as per  
DIN 74324-1 and DIN 73378
- Temperature of use: **-20°C to +90°C**
- Tube: PLASTUB® PA translucent or black
  - Sheath: PLASTUB® GR black
- Non flame-propagating PVC type  
C2 as per NF C 32070
- Recommended connection:  
quick-fit connector

### Options (contact us)

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	External diameter on sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

## TUBOL® PA ATEX\*

PA ATEX® tube with  
PEHDSC sheath

### Description

Antistatic polyamide extruded and calibrated tube, high density polyethylene semi-conductor sheath

### Applications

Pressurised transport of compressed air, lubricant in ATEX environment

### Fields

Maintenance, control, process, instrumentation, petrochemicals

### General characteristics

- Calibrated antistatic internal tube
- Semi-conductor external sleeving
- Good resistance to impacts and abrasion
- Very good UV resistance

### Technical data

- Standard: Internal tube ATEX Sector II G/D,
  - Surface resistivity:  $10^6 \Omega$  as per IEC 62631
- Volume resistivity of sleeving at 23°C: 25  $\Omega$ .cm as per ASTM D 991
- Temperature of use: **-20°C to +60°C**
  - Tube: PLASTUB® PA ATEX black
  - Sheath: PLASTUB® PEHDSC black
    - Recommended connection: quick-fit connector

## TUBOL® PEP

### HDPE tube with PVC sheath

#### Description

High density polyethylene extruded and calibrated tube, polyvinyl chloride sheath

#### Applications

Pressurised transport of compressed air, lubricant

#### Fields

Maintenance, control, process, instrumentation

#### General characteristics

- Sparkproof sheath
- Calibrated internal tube
- Good resistance to impacts and abrasion
- Very good UV resistance
- Very good chemical resistance

#### Technical data

- Standard: Material suitable for food contact under certain conditions
- Temperature of use: **-15°C to +50°C**
- Tube: PLASTUB® PEHD translucent or black
  - Sheath: PLASTUB® GR black - Non flame-propagating PVC type C2 as per NF C 32070
- Recommended connection: quick-fit connector

#### Options (contact us)

- Other diameters

## TUBOL® PTFEP

PTFE tube with PVC sheath

### Description

Polytetrafluoroethylene extruded tube,  
polyvinyl chloride sheath

### Applications

Pressurised transport of chemically  
aggressive fluids, gas

### Fields

Medical, pharmaceutical, agriculture,  
laboratory, cosmetics

### General characteristics

- Sparkproof sheath
- Good resistance to impacts and abrasion
- Very good UV resistance
- Excellent chemical resistance

### Technical data

- Standard: \* Tube material FDA-approved 21  
CFR 177 1550
- Temperature of use: **-20 to +90°C**
- Tube: ELASTUB® PTFE translucent
- Sheath: PLASTUB® GR black -  
Non flame-propagating PVC type C2  
as per NF C 32070
- Recommended connection:  
compression tube fittings

## COPPER TUBES WITH REINFORCING SHEATH

# REINFORCED TUBES

### TUBOL® CRP

#### Copper tube with PVC sheath

#### Description

Annealed copper tube, polyvinyl chloride sheath

#### Applications

Pressurised transport of compressed air, lubricant

#### Fields

Maintenance, control, process, instrumentation

#### General characteristics

- Very good resistance to pressure
- External mechanical and chemical resistance

#### Technical data

- Standard: Cu – B1 as per NF EN 12735-2
- Annealed, dust-free, dehydrated, weldless
  - Temperature of use: **-20°C to +90°C**
    - Sheath: PLASTUB® GR red - Non flame-propagating PVC type C2 as per NF C 32070
  - Recommended connection: bicone ring connector

#### Options (contact us)

- Other sheath colours
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Diameter on PVC sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)

### Description

Rigid polyamide extruded and calibrated tubes, flat high density polyethylene sheath

### Applications

Pressurised transport of compressed air, lubricants  
Spraying, greasing

### Fields

Maintenance, control, process, instrumentation, petrochemicals

### General characteristics

- Good resistance to impacts and abrasion
  - Very good UV resistance
- Very good chemical resistance
  - Colour identification
- Improved pressure resistance

### Technical data

- Standard: Internal tubes approved as per DIN 73378
- Temperature of use: -15°C to +50°C
- Tubes: PLASTUB® PAR black and red
  - Sheath: PLASTUB® PEHD black
  - Recommended connection: quick-fit connector

### Options (contact us)

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
- Other qualities of interior tubes
- Other qualities of external sheaths

Nominal internal diameter (mm)	Nominal outside diameter (mm)	Form of sheath	Thickness of sheath (mm)	Bending radius* (mm)	Operating pressure* (bar)	Burst pressure* (bar)	Nominal linear weight (g/m)
3	6	Flat cable	1	50	60	267	78
5	8	Flat cable	1	70	64	192	110

Nominal internal diameter (mm)	Standard packaging	
	Roll (m)	Drum (m)
3	100	500
5	100	500

Standard tolerances: refer to pages 115 to 118.

\*Values provided for information purposes for an ambient temperature of 23°C.

## BITUBE® PEP

2 HDPE tubes  
with PVC sheath

### Description

High density polyethylene extruded tube,  
flat polyvinyl chloride sheath

### Applications

Pressurised transport of  
compressed air, chemical products,  
gas, lubricant

### Fields

Maintenance, control, process,  
instrumentation

### General characteristics

- Sparkproof sheath
- Good resistance to impacts and abrasion
- Very good UV resistance
- Very good chemical resistance
- Colour identification

### Technical data

- Temperature of use: -15°C to +50°C
- Tubes: PLASTUB® HDPE translucent and black
- Sheath: PLASTUB® GR black -  
Non flame-propagating PVC type C2  
as per NF C 32070
- Recommended connection:  
quick-fit connector

### Options (contact us)

- Other diameters
- Other packaging
- Surface marking

## BITUBE® PTFEP

2 PTFE tubes  
with PVC sheath

### Description

Polytetrafluoroethylene extruded tube,  
flat polyvinyl chloride sheath

### Applications

Pressurised transport of chemically  
aggressive fluids, gas

### Fields

Medical, pharmaceutical, agriculture,  
laboratory, cosmetics

### General characteristics

- Sparkproof sheath
- Good resistance to impacts and abrasion
- Very good UV resistance
- Excellent chemical resistance

### Technical data

- Standard: \* Approved tube material  
FDA 21 CFR 177 1550
- Temperature of use: **-20°C to +90°C**
- Tubes: ELASTUB® PTFE translucent
  - Sheath: PLASTUB® GR black -  
Non flame-propagating PVC type C  
as per NF C 32070
- Recommended connection:  
compression tube fittings

## BITUBE® PA + Cable

2 PA tubes  
+ cable assembled with  
PVC sheath

### Description

Polyamide extruded and calibrated tubes  
+ cable, assembled,  
round polyvinyl chloride sheath

### Applications

Transport of compressed air  
and control signals

### Fields

Maintenance, control, process,  
instrumentation

### General characteristics

- Calibrated internal tubes
  - Colour identification
- Spiral tube and cable assembly:  
optimised bending radius and flexibility
- Simplification and shorter cabling  
installation times
  - Wide range
- Good UV resistance

### Technical data

- Standard: Internal tubes approved as per  
DIN 74324-1 and DIN 73378
- Temperature of use: **-30 to +70°C**
  - Tubes: PLASTUB® PA
- Sheath: PLASTUB® PVC33 black
  - Recommended connection:  
electrical-pneumatic connector

### Options (contact us)

- Other diameters
- Other packaging
- Surface marking
- Other tube and/or sheath colours
  - Other cables
- Other qualities of interior tubes
- Other qualities of external sheaths

2 PLASTUB® PA tubes Ø4x6  
+ 3 PLASTUB® PA tubes Ø2.7x4  
+ 1 PLASCORD® 33 rod Ø6, assembled  
with PLASTUB® PVC33 black round sheath.

**Description**

Specific assemblies of different elements:  
electric or traction cables, rods, reinforcing  
fibres, pre-split wire, optical fibre, shielding etc.  
External sheathing on demand

**Applications**

Transport of compressed air  
and control signals

**Fields**

Maintenance, control, process,  
instrumentation

**General characteristics**

- Spiral assembly of elements:  
optimised bending radius  
and flexibility
- Simplification and shorter  
cabling installation times

## THERMOPLASTIC EXTRUDED SLEEVINGS

# SLEEVINGS

### PLASTUB® GS

PVC sleeving 84 Shore A  
70°C, crystal

#### Description

Polyvinyl chloride extruded sleeving

#### Applications

Mechanical and electrical protection for cable harnesses

#### Fields

Industrial cabling, miscellaneous industries

#### General characteristics

- Very flexible
- Economical
- Recyclable

#### Technical data

- Standard: NF EN 60684-2
- Temperature of use: **-20°C to +70°C**
  - Dielectric rigidity: 16 Kv/mm
  - Nominal hardness: 84 Shore A as per ISO R 868
- Nominal density: 1.24 as per ISO 1183
  - Tensile strength: >21 Mpa as per ISO R 527
- Elongation at break: >320 % as per ISO R 527
  - Standard colour: crystal

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
  - Surface marking
- Additives: Anti-UV, antibacterial etc.
  - Pre-split versions

### PLASTUB® GHT

PVC sleeving 92 Shore A  
105°C, black

#### Description

Polyvinyl chloride extruded sleeving

#### Applications

Mechanical protection and electrical insulation for cable harnesses

#### Fields

Automobile, industrial cabling

#### General characteristics

- Flexible
- Economical
- Recyclable
- Improved resistance to temperature

#### Technical data

- Standard: NF EN 60684-2
- Temperature of use: **-15°C to +105°C**
  - Dielectric rigidity: 16 Kv/mm
  - Nominal hardness: 92 Shore A as per ISO R 868
- Nominal density: 1.40 as per ISO 1183
  - Tensile strength: >16 Mpa as per ISO R 527
- Elongation at break: >210 % as per ISO R 527
  - Standard colour: black

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti UV
- Pre-split versions

### PLASTUB® GHTC PVC sleeving 78 Shore A 105°C, black

#### Description

Polyvinyl chloride extruded sleeving

#### Applications

Mechanical and electrical protection for cable harnesses

#### Fields

Automobile, industrial cabling

#### General characteristics

- Very flexible
- Economical
- Recyclable
- Improved resistance at low temperature

#### Technical data

- Standard: NF EN 60684-2
- Temperature of use: **-35°C to +105°C**
  - Dielectric rigidity: 16 Kv/mm
  - Nominal hardness: 78 Shore A as per ISO R 868
- Nominal density: 1.37 as per ISO 1183
  - Tensile strength: >14 Mpa as per ISO R 527
  - Elongation at break: >320 % as per ISO R 527
  - Standard colour: black

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti UV
- Pre-split versions

## SPECIAL POLYMER EXTRUDED SLEEVINGS

# SLEEVINGS

### ELASTUB® GST73

TPE sleeving 78 Shore A  
125°C, black

#### Description

SANTOPRENE® type  
polymer extruded sleeving

#### Applications

Mechanical and electrical  
protection for cable harnesses

#### Fields

Automobile, industrial cabling

#### General characteristics

- Resistant to high temperatures
- Excellent weather resistance
- Recyclable

#### Technical data

- Standard: Approved material UL94 HB  
thickness 1 mm FMV SS 302  
(equiv. NF ISO 3795)
- Temperature of use: **-40°C to +125°C**
  - Dielectric rigidity: 18 Kv/mm
  - Nominal hardness: 78 Shore A  
as per ISO R 868
- Nominal density: 0.98 as per ISO 1183
  - Tensile strength: >8.3 Mpa  
as per ISO 37
- Elongation at break: >375 % as per ISO 37
  - Standard colour: black

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Fire-retardant versions

125°C, black, fire-retardant

#### Description

SANTOPRENE® type  
polymer extruded sleeving

#### Applications

Mechanical and electrical  
protection for cable harnesses

#### Fields

Automobile, industrial cabling

#### General characteristics

- Fire-retardant
- Resistant to high temperatures
- Excellent weather resistance
- Recyclable

#### Technical data

- Standard: Approved material UL94 V0  
thickness  $\geq 1.5$  mm,  
UL94 V2 thickness 1 mm
- Oxygen index: 26 % as per ISO 45089-2
- Temperature of use: -40°C to +125°C
  - Dielectric rigidity: 18 Kv/mm
  - Nominal hardness: 75 Shore A  
as per ISO R 868
- Nominal density: 1.22 as per ISO 1183
- Tensile strength:  $>8.7$  Mpa as per ISO 37
- Elongation at break:  $>520$  % as per ISO 37
  - Standard colour: black

### ELASTUB® THERMO POX

Polyolefin heat-shrink sleeving, 135°C, black

#### Description

Polyolefin extruded sleeving, irradiated

#### Applications

Mechanical and electrical protection for cable harnesses, identification

#### Fields

Automobile, industrial cabling, modelling

#### General characteristics

- Dimensionally adaptable
- Self-extinguishing

#### Technical data

- Standard: NF EN 60684-2, UL 224 VW-1
- Temperature of use: **-55°C to +135°C**
  - Dielectric rigidity: 19 Kv/mm as per ASTM D2671
- Nominal density: 1.02 as per ASTM D792
  - Tensile strength: >11 Mpa as per ASTM D638
  - Elongation at break: >200 % as per ASTM D638
  - Standard colour: black
  - Shrinkage coefficient: 2/1
- Shrinkage temperature: **+90°C**

#### Options (contact us)

- Other diameters
- Other shrinkage coefficients
- Other solid colours
  - Cut to lengths
- Other packaging
- Surface marking

# SLEEVINGS

## SILITUBE® GSI811

Silicon sleeving 68 Shore A  
200°C, grey-blue

### Description

Silicone elastomer extruded sleeving

### Applications

Mechanical and electrical protection for cable harnesses

### Fields

Rail industry

### General characteristics

- Flexible and elastic
- Resistant to very high temperatures
- Dielectric strength
- Fire / smoke classification
- Excellent weather resistance
- Water-repellent and anti-adhesive

### Technical data

- Standard: Blend approved I2-F1 as per NF F 16-101 and STM-S-001/C
- Oxygen index: 34,7 % as per ISO 45089-2
- Temperature of use: **-80°C to +200°C**
  - Dielectric rigidity: 20 Kv/mm
  - Nominal hardness: 68 Shore A as per DIN 53505
- Nominal density: 1.20 as per ISO 1183
- Tensile strength: >8 Mpa as per ISO 37
- Elongation at break: >350 % as per ISO 37
  - Standard colour: grey-blue

### Options (contact us)

- Other diameters
- Cut to lengths
- Other packaging

## FIBREGLASS BRAIDED SLEEVING WITH SILICONE COATING

# SLEEVINGS

### SILIGAINÉ® 15C3

Silicone fibreglass sleeving  
250°C

#### Description

Fibreglass braided sleeving  
with silicone elastomer coating

#### Applications

Mechanical and electrical  
protection for cable harnesses

#### Fields

Automobile, electrical and  
electronic construction

#### General characteristics

- Flexible
- Resistant to very high temperatures
  - Good flame resistance
  - Self-extinguishing
- Excellent weather resistance
  - Halogen-free

#### Technical data

- Standard: NF EN 60684-2,  
IEC 60684-3 part 401
- Temperature of use: **-60°C to +250°C**
- Dielectric rigidity: >3 Kv/mm
- Standard colour: brick red
- Peak temperature: **+300°C**

#### Options (contact us)

- Other solid colours
  - Cut to lengths
- Other dielectric rigidities
- Other coatings

Nominal internal diameter (mm)	Nominal thickness (mm)	Nominal linear weight (g/m)	Standard packaging Roll (m)
0,5	0,2	2	200
0,8	0,2	3	200
1	0,2	3	100
1,5	0,2	5	100
2	0,2	6	100

## FIBREGLASS BRAIDED SLEEVING WITH SILICONE COATING

# SLEEVINGS

### SILITUBE® X

Fire-retardant mineral fibre  
sleeving with silicone coating  
260°C

#### Description

Mineral fibre braided sleeving  
with silicone elastomer coating

#### Applications

Thermal protection and against  
incandescent projections

#### Fields

Glassworks, foundries, steel making etc.

#### General characteristics

- Flexible
- Resistant to very high temperatures
- Good resistance to flames and  
incandescent projections
  - Fire-retardant
- Excellent weather resistance
- Asbestos-free

#### Technical data

- Standard: Inspired by American aeronautical  
standards SAE.AS1055 and AS1072,  
NF F 16-101, IEC 60695-2-10 and  
IEC 60695-2-11, UNI CEI 11170-3,  
NF EN 45545-2
- Temperature of use: **-60°C to +260°C**
  - Standard colour: brick red
- Peak temperature: 30 min at **+800°C**,  
15 min at **+1100°C**, 1 min at **+1500°C**

#### Options (contact us)

- Cut to lengths

Nominal internal diameter (mm)	Nominal internal diameter (inch)	Nominal thickness (mm)	Nominal linear weight (g/m)	Standard packaging
8	5/16"	4	120	on request
10	3/8"	4	140	on request
13	1/2"	4	200	on request
16	5/8"	4	220	on request
19	3/4"	4	240	on request
22	7/8"	4	260	on request
25	1"	4	290	on request
32	1" 1/4	4	380	on request
38	1" 1/2	4	440	on request
45	1" 3/4	4	490	on request
51	2"	4	540	on request
57	2" 1/4	4	600	on request
64	2" 1/2	4	680	on request
76	3"	4	880	on request
89	3" 1/2	4	960	on request
102	4"	4	1,170	on request

*The flexibility and extra wall thickness of the SILITUBE® X negates the need to indicate tolerances on the internal diameter.*

## MONOFILAMENT BRAIDED SLEEVINGS, UNCOATED

# SLEEVINGS

### SILIGAINÉ® TN Polyester sleeving 150°C

#### Description

Monofilament polyester fibre braided sleeving

#### Applications

Mechanical protection for cable harnesses

#### Fields

Automobile, industrial cabling

#### General characteristics

- Expandable.
- Good resistance to abrasion and cuts
- Excellent resistance to humidity and mould

#### Technical data

- Standard: NF EN 60684-3 parts 340 to 342
- Temperature of use: **-50°C to +150°C**
- Peak temperature: **+175°C**

#### Options (contact us)

- Other solid colours
- Cut to lengths

Nominal internal diameter (mm)	Minimum internal diameter (mm)	Maximum internal diameter (mm)	Standard packaging Roll (m)
3	1	6	100
4	2	7	100
5	3	9	100
6	4	11	100
8	5	13	100
10	6	17	100
12	8	21	50
15	10	24	50
20	13	28	50
25	14	36	50
30	17	43	50
40	25	60	25
50	35	75	25

*The extreme flexibility of SILIGAINÉ® negates any need to show tolerances on the internal diameter.*

#### Variant

SILIGAINÉ® TPA  
Polyamide sleeving 100°C

## STAINLESS STEEL WIRE BRAIDED SLEEVINGS

# SLEEVINGS

### METALTRESSE® Metallic sleeving

#### Description

Stainless steel wire braided sleeving

#### Applications

Thermal protection and against incandescent projections, shielding

#### Fields

Glassworks, foundries, steel making, electrical industries

#### General characteristics

- Expandable.
- Excellent mechanical strength

#### Technical data

- Specific requirements: contact us

#### Options (contact us)

- Other diameters
- Other packaging
- Other braid qualities

Nominal internal diameter (mm)	Wire diameter (mm)	Nominal linear weight (mm)	Standard packaging
8 - 10	0,2	57	on request
10 - 12	0,2	69	on request
12 - 14	0,2	82	on request
14 - 16	0,25	118	on request
16 - 20	0,25	141	on request
20 - 30	0,25	196	on request
30 - 40	0,25	234	on request

*The flexibility of METALTRESSE® negates any need to show tolerances on the internal diameter.*

## THERMOPLASTIC EXTRUDED RODS & CORDS

# RODS, CORDS & PROFILES

### PLASCORD® PVC23

PVC rod 79 Shore A  
Crystal

#### Description

Polyvinyl chloride extruded rod

#### Applications

Production of bolt ropes, leaktight seals

#### Fields

Tarpaulin, sail, canvas, blind manufacturers

#### General characteristics

- Very flexible
- Economical
- Recyclable

#### Technical data

- Temperature of use: -30°C to +70°C
- Nominal hardness: **79 Shore A**  
as per ISO R 868
- Nominal density: 1.24 as per ISO 1183
- Tensile strength: >17 Mpa as per ISO R 527
  - Elongation at break: >280 %  
as per ISO R 527
- Standard colour: crystal

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Surface marking
- Additives: Anti-UV, antibacterial etc.

## SILICONE ELASTOMER EXTRUDED RODS AND CORDS

# RODS, CORDS & PROFILES

### SILFORM® ROD SI70

Silicone rod  
70 Shore A 180 °C  
Food grade translucent

#### Description

Silicone elastomer extruded rod

#### Applications

Leaktight seal

#### Fields

Miscellaneous industries

#### General characteristics

- Flexible and elastic
  - Food grade
- Resistant to high temperatures
  - Can be sterilised in autoclave
- Good resistance to aggressive fluids, alcohols and acids
  - Excellent weather resistance
- Water-repellent and anti-adhesive
- Chemically inert and biologically neutral

#### Technical data

- Standard: \* FDA-approved material: 21 CFR 177.2600, European regulation 1935/2004, European pharmacopeia section 3.1/9
- Temperature of use: **-60°C to +180°C**
  - Nominal hardness: **70 Shore A** as per DIN 53505
- Nominal density: 1.19 as per ISO 1183
  - Tensile strength: >10 Mpa as per DIN 53504 S1
  - Elongation at break: >400 % as per DIN 53504 S1
- Standard colour: translucent
  - Peak temperature: **+200°C**

#### Options (contact us)

- Other diameters
- Other solid colours
  - Cut to lengths
- Other packaging
- Other hardness values

Leaktight seals, aesthetics, mechanical protection, production

## **Fields**

Miscellaneous industries, saddlery, leatherwork

## **PLASFORM®**

### **THERMOPLASTIC PROFILES**

#### **PVC PP PE profiles**

##### **Description**

Polyvinyl chloride, polypropylene or polyethylene extruded profiles

##### **General characteristics**

- Flexible, economic, versatile
- Wide range of colours
- Good resistance to acids, bases and detergents
- Recyclable

### **SPECIAL POLYMER PROFILES**

#### **TPE profiles**

##### **Description**

EPDM polymer extruded profiles

##### **General characteristics**

- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

## **SILFORM®**

### **SILICONE ELASTOMER PROFILES**

#### **Silicone profiles**

##### **Description**

Silicone elastomer extruded profiles

##### **General characteristics**

- Flexible and elastic
- Food grade
- Resistant to high temperatures
- Can be sterilised in autoclave
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue
- Water-repellent and anti-adhesive
- Excellent weather resistance
- Good resistance to aggressive fluids, alcohols and acids
- Low deformation under compression and traction

## EXTRUDED PROFILES

# RODS, CORDS & PROFILES

### SQUARE / RECTANGULAR PROFILES PRODUCTION EXAMPLES

#### Applications

Leaktight seals, seals, shock absorbers

**PLASFORM®  
PVC22 PFN 71**

**SILFORM®  
SI60 PFN C6**

**SILFORM®  
SI60 PFN C20**

**SILFORM®  
SI70 PFN 78**

### ORNAMENTAL PROFILES PRODUCTION EXAMPLES

#### Applications

Cover parts, screw caps, staple caps

**PLASFORM®  
PVC36 PFN 73**

**PLASFORM®  
PVC22 PFN 70**

**PLASFORM®  
PVC33 PFN 118**

### BI-TUBE PROFILES PRODUCTION EXAMPLES

#### Applications

Combined transport of air and fluids

**PLASFORM®  
PVC22 PFN 85**

**PLASFORM®  
PVC22 PFN 71**

**PLASFORM®  
PVC23 PFN 88**

**THERMOPLASTIC COVERINGS**

- Economic, versatile
- Wide range of colours for identification
- Ease of installation
- Vast mechanical properties depending on thermoplastics
- Good chemical resistance
- Good dielectric insulation

**SPECIAL POLYMER COVERINGS**

- Excellent weather resistance
- Very good chemical resistance
- Characteristics similar to many vulcanised rubbers

**SILICONE ELASTOMER COVERINGS**

- Flexible and elastic
- Resistant to high temperatures
- Good thermal insulation
- Very good dielectric insulation
- Excellent weather resistance
- Food grade
- Can be sterilised in autoclave
- Good chemical resistance
- Water-repellent and anti-adhesive
- Chemically inert and biologically neutral
- Good resistance to dynamic fatigue

**THERMAL PROTECTION****Production example**

Brick red silicone sleeving on PTFE hose

**Applications**

Anti-burn protection

**AESTHETIC FINISH****Production example**

White PVC sleeving on corrugated steel pipe

**Applications**

Make outer surface smooth for cleaning in medical environment

## COVERINGS

# SUPPLEMENTARY RANGE

### IDENTIFICATION

#### Production example

Coloured PVC sheathing on R2V cable

#### Applications

Colour marking for specific identification

### MECHANICAL PROTECTION

#### Production example

Polyurethane sheathing on stainless steel capillary tube

#### Applications

Anti-abrasion coating

### ELECTRICAL INSULATION

#### Production example

Coloured PVC sheathing on bare copper braid

#### Applications

Electrical insulation

### CHEMICAL PROTECTION

#### Production example

PVC sheathing on metal spring sleeving

#### Applications

Anti-corrosion protection in chlorinated ambient air

## **STEEL WIRE BRAIDS**

- Galvanised steel or AISI stainless steel 304L wire
- Bare copper, tin-plated copper, nickel-plated copper, silver-plated copper

## **TEXTILE STRAND BRAIDS**

- Polyamide, polyester, high-resistance polyester, aramid strands
- Glass / mineral fibres

## **THERMAL PROTECTION**

### **Production example**

Fibreglass braid

### **Applications**

Tube protection against heat

## **SHIELDING**

### **Production example**

Tin-plated copper wire braid

### **Applications**

Electrical shield / electromagnetic compatibility

## **MECHANICAL REINFORCEMENT**

### **Production example**

Meta-aramid or para-aramid fibre braid

### **Applications**

Improved resistance to pressure, aeronautical wiring

## **IDENTIFICATION**

### **Production example**

Stainless steel wire braid with one or more coloured spiral tracers

### **Applications**

Identification of fluid transported

## CALCULATION OF LINEAR WEIGHT OF BARE TUBE

\*The linear weight of a tube or sleeving varies according to its diameter, its thickness and the constituent material.

$$M = [(\pi * D^2) / 4 - (\pi * d^2) / 4] * G$$

**M:** Linear weight  
 **$\pi$ :** 3.14159265359  
**D:** External tube diameter  
**d:** Internal tube diameter  
**G:** Material density

### Equivalence in units of pressure

- Pressure in N/m<sup>2</sup> = Pressure in bar \* 100,000
- Pressure in N/m<sup>2</sup> = Pressure in Psi \* 6,894.8
- Pressure in Psi = Pressure in N/m<sup>2</sup> \* 14,500
- Pressure in bar = Pressure in Psi \* 0.0689
- Pressure in Kg/cm<sup>2</sup> = Pressure in bar \* 0.9806

### Conversion factors for metric and imperial units

MEASUREMENT	US/GB UNITS	METRIC UNITS	US/GB SI	US/GB SI
<b>Lengths</b>	Inch = inches (in)	Metre (m)	(in) x 0.0254 = (m)	(m) x 39.370 = (in)

# TECHNICAL FORM

## Dimensional tolerances (mm) applicable to PVC and TPE special polymer thermoplastic extruded tubes and sleeveings

The values of the nominal linear weights are indicative and vary according to the diametrical and material density tolerances.

Diameters (internal or outside)	Tolerances applicable to diameter
$\varnothing \leq 6$ mm	+/- 0.2 mm
$\varnothing > 6$ mm and $\varnothing \leq 12$ mm	+/- 0.3 mm
$\varnothing > 12$ mm and $\varnothing \leq 20$ mm	+/- 0.4 mm
$\varnothing > 20$ mm and $\varnothing \leq 30$ mm	+/- 0.7 mm
$\varnothing > 30$ mm and $\varnothing \leq 40$ mm	+/- 1 mm
$\varnothing > 40$ mm	+/- 3 mm
Lengths	Tolerances applicable to cut lengths
< 100 mm	+/- 2 mm
101 to 300 mm	+/- 3 mm
301 to 400 mm	+/- 4 mm
401 to 500 mm	+/- 5 mm
501 to 600 mm	+/- 6 mm
601 to 700 mm	+/- 7 mm
701 to 800 mm	+/- 8 mm
801 to 900 mm	+/- 9 mm
901 to 1000 mm	+/- 10 mm
1001 to 1100 mm	+/- 11 mm
1101 to 1200 mm	+/- 12 mm
1201 to 1300 mm	+/- 13 mm
1301 to 1400 mm	+/- 14 mm
1401 to 1500 mm	+/- 15 mm
1501 to 1600 mm	+/- 16 mm
1601 to 1700 mm	+/- 17 mm
1701 to 1800 mm	+/- 18 mm
1801 to 1900 mm	+/- 19 mm
1901 to 3000 mm	+/- 20 mm
3001 to 6000 mm	+/- 1 %
Roll	+/- 1 %

Due to its limited thickness, a silicone sleeving is relatively elastic, which makes it difficult to verify its length, hence the following tolerance

PLASTUB® PVC120  
PLASTUB® PVC21  
PLASTUB® PVC22  
PLASTUB® PVC23  
PLASTUB® PVC24  
PLASTUB® PVC29  
PLASTUB® PVC33  
PLASTUB® PVC42  
PLASTUB® GS  
PLASTUB® GR  
PLASTUB® GHT  
PLASTUB® GHTC

ELASTUB® ST73  
ELASTUB® ST87  
ELASTUB® GTS  
ELASTUB® GST73  
ELASTUB® GST170

## Dimensional tolerances (mm) applicable to silicone elastomer tubes, sleeveings and rods

Diameters (internal or outside)	Tolerances applicable to diameter
$\varnothing \leq 3$ mm	+/- 0.2 mm
$\varnothing > 3$ mm and $\varnothing \leq 4$ mm	+/- 0.3 mm
$\varnothing > 4$ mm and $\varnothing \leq 6$ mm	+/- 0.35 mm
$\varnothing > 6$ mm and $\varnothing \leq 10$ mm	+/- 0.4 mm
$\varnothing > 10$ mm and $\varnothing \leq 15$ mm	+/- 0.5 mm
$\varnothing > 15$ mm	+/- 0.7 mm
Lengths	Tolerances applicable to cut lengths
< 100 mm	+/- 3 mm
101 to 200 mm	+/- 4 mm
201 to 300 mm	+/- 5 mm
301 to 400 mm	+/- 6 mm
401 to 500 mm	+/- 7 mm
> 500 mm	+/- 10 mm

The information given in this technical data sheet is indicative and subject to change without prior notice. As the conditions of use and the environment in which the product is used cannot be fully covered in our design work, PLASTUB shall not assume liability for any incidents in the event of inappropriate use and/or not carried out according to best practices and applicable standards.

To ensure optimal use of our products, we recommend full tests in real-life situations.

To this end, our sales department is on hand to supply samples and/or to examine the conditions of comprehensive testing in our laboratories.

# PLASTUB® GENERAL TERMS AND CONDITIONS OF SALE

## Article 1 - Application of general terms and conditions of sale

These general terms and conditions of sale are systematically sent or delivered to each customer when a customer account is created, or recalled when a quotation is provided to enable the customer to place an order.

Consequently, placing an order implies full and unequivocal acceptance of these GENERAL TERMS AND CONDITIONS OF SALE to the exclusion of all other documents.

Unless otherwise formally accepted in writing by PLASTUB, no special conditions shall prevail over these GENERAL TERMS AND CONDITIONS OF SALE. Unless otherwise expressly accepted, no customer conditions to the contrary shall therefore be imposable on PLASTUB.

Should PLASTUB not impose the application of any of any of the GENERAL TERMS AND CONDITIONS OF SALE at any given moment, this may not be interpreted as its renoucement of imposing any such terms and conditions at a later time.

Our general terms and conditions of sale may be consulted on request.

## Article 2 – Orders

To be correctly registered, all orders must be placed in writing or sent by fax or e-mail to the main PLASTUB correspondence address in AMBERT, Puy-de-Dôme, France.

Orders shall be confirmed by PLASTUB by acknowledgement of receipt in the form of a fax, e-mail or standard letter bearing an official PLASTUB signature.

The order and any amendments shall indicate the PLASTUB product references, the price proposal references, the price, delivery lead time, transport conditions and terms of payment, as well as the references of the documents concerning the product technical specifications, packaging, delivery location and where necessary the quality or technical documents requested to accompany the delivery.

All orders are considered to be firm and definitive on the date of transmission of the order acknowledgement issued by PLASTUB.

## Article 3 – Order of modification

Any changes to the order by the customer shall be notified in writing and to be valid, must be covered by a new acknowledgement of receipt signed by PLASTUB and setting out the consequences in terms of price and lead time. Changes to the order may give rise to the definition of a new price proposal.

Any cancellation of an order shall give rise to payment of the services already delivered by PLASTUB.

Any modification of the order resulting from abnormal conditions of use or conditions not indicated in the specifications shall give rise to a new price proposal.

## Article 4 – Delivery lead times

The dates indicated on the acknowledgement of receipt correspond to the dates of shipment.

The delivery lead times are indicated as precisely as possible but depend on the conditions of supply and transport affecting PLASTUB. PLASTUB undertakes to implement the greatest diligence possible to respect these lead times.

Overrun of delivery lead times shall not give rise to compensation, withheld payment nor cancellation of active orders. In particular, it is specified that delays due to weather conditions shall not give rise to compensation. Moreover, PLASTUB shall not be held liable for delays caused by subcontractors imposed by the customer nor the late delivery of products or services by the customer.

Any changes to the order shall give rise to corresponding changes in lead times.

The following are considered to be force majeure events discharging PLASTUB from its obligation to deliver: war, riots, fire, strikes, accidents, impossibility to obtain delivery itself, accidents involving tools, machine breakage, transport interruption or delays.

PLASTUB shall inform the customer of any delays in as timely a manner as possible.

In all events, delivery within the deadline can only occur if the customer is up-to-date with its obligations towards PLASTUB.

## Article 5 – Transport

Unless an order value is below the minimum defined in the price proposal, products are sold carriage paid. For order values below this minimum, products are dispatched collect or carriage forward and billable.

PLASTUB shall organise transport and assume the costs.

Consequently, products are shipped at the risk and peril of the customer. Our prices are based on normal courier transport rates. If a more expensive shipment method is used at the customer's request (Express courier, parcel delivery service), the additional cost is fully borne by the customer.

In the event of loss or damage, the customer shall address all actions to the shipping provider as per the conditions of article L.133-6 of the French commercial code.

All complaints for damage or partial loss must be made by extrajudicial measures or by registered post to the shipment provider within three days, excluding bank holidays.

Where necessary, the customer must indicate any reservations on the delivery note signed by the delivery driver and keep a copy. Visible damage must be photographed in the presence of the delivery driver.

Any claims concerning the non-delivery of products must be submitted within eight (8) days of the date of invoice.

For deliveries outside of France, sales are completed Ex Works (latest version drawn up by the International Chamber of Commerce - ICC), unless a different Incoterm is selected on the acknowledgement of receipt of the order.

## Article 6 – Product reception & acceptance

On reception of the products, the customer shall verify that all products delivered are compliant with those ordered and the absence of visible defects.

Where necessary, the customer must indicate any reservations on the delivery note signed by the delivery driver and keep a copy.

It is incumbent on the customer to provide justification of the effective nature of the defects or anomalies observed. The customer shall allow PLASTUB full freedom to observe these defects and deliver a suitable remedy. The customer shall refrain from undertaking such actions or from delegating a third party to do so.

All claims shall indicate the numbers of the purchase order, of the delivery notes, of the parts (spool or drum number) and of batches, and be supported by samples of the defective products.

If no complaints or reservations are made by the customer to this end within right (8) days of receiving the products, said products are considered to be accepted.

If a specific technical acceptance procedure is applicable, the procedure shall be subject to special conditions and acceptance shall be issued in the form of a written report signed by all parties.

The cost of work resulting from reservations accepted by PLASTUB shall be borne by PLASTUB.

The customer shall perform product tests and verifications required for its intended use of the products.

Information contained in technical data sheets is given for product use in normal conditions as specified in these documents. Consequently, it is important for the customer to perform prior tests to ensure the product is able to fulfil the intended functions.

PLASTUB shall accept no product returns without prior authorisation.

## Article 7 – Price

### 7.1 – Price

Unless express terms are defined specific to the order, the product prices are those specified in the price proposal.

The validity period of firm price proposals is one month, unless other provisions are defined in the price proposal.

The prices indicated on quotations exclude taxes (VAT) and include the costs of packaging and packing unless otherwise specified in the quotations.

Discounted prices applicable to pre-determined quantities may not be applied to a lesser quantity. In the event a lower quantity is ordered, the price will be revised.

### 7.2 – Terms of payment - currency

Our invoices are payable in AMBERT. If payment is made by banker's draft, it must be returned to us within eight (8) days as specified by the Code of Commerce.

Unless other conditions are expressly indicated in the specific terms and conditions of the order, payment is due 30 after the date of invoice, net and without reduction.

In no event may payments due to PLASTUB be suspended nor subject to reduction or compensation without the written agreement of PLASTUB. All payments made to PLASTUB are applied to sums due whatever the origin, starting with the oldest payables.

Unless otherwise indicated in the price proposal, the applicable currency is the Euro.

Non-payment of an invoice shall entitle PLASTUB to demand payment prior to any future shipments of products, whatever the terms and conditions of the purchase order in question.

Early payment shall give rise to a 1% discount per full month early.

### 7.3 – Advance payment

PLASTUB may require an advance payment from the time of receipt of the acknowledgement of receipt of the purchase order and the proforma invoice. The amount of the advance payment will be between 10% and 30% depending on the nature of the products sold or services to be delivered.

### 7.4 – Late payment penalties

In the event of late payment, a 5% penalty shall be applied to the pre-tax invoice amount for each month late, while this rate may not be less than three times the legal interest rate. A flat rate indemnity of 40 Euro shall also be applied for recovery costs. The creditor may demand supplementary compensation if the actual recovery costs exceed 40 Euro.

## Article 8 – Safety stock

Requests for safety stocks will only become valid after signature of a letter of agreement between PLASTUB and the customer to maintain a safety stock.

Letters of agreement concerning safety stocks are valid for a period of one (1) year. The parties agree to meet two (2) months prior to the end of the validity period to sign a new letter of agreement on safety stocks. When the customer requires that PLASTUB provides safety stocks, the customer also agrees to purchase the whole remaining stock at the end of the agreement period.

If the safety stock is delivered, PLASTUB shall replace the stock within the deadlines specified in the letter of agreement for safety stock, unless otherwise expressed in writing by the customer on the date of request to deliver the safety stock.

The customer shall be obliged to purchase the replaced safety stock.

The composition of the safety stock shall be defined jointly by the Parties, two (2) months prior to the end of validity of the letter of agreement.

## Article 9 – Confidentiality

The customer shall consider as strictly confidential, all information, technical formulae or concept given or which come into its possession under this agreement. In terms of the application of this clause, the customer is also fully responsible for its employees. Nonetheless, the customer shall not be held liable for disclosure if the elements disclosed are in the public domain or if the customer had prior knowledge of such elements or obtained them from third parties via legitimate means.

Similarly, PLASTUB agrees to maintain the confidentiality of information it obtains in the course of this agreement and to refrain from disclosure to any other party, either during performance of the agreement or following its termination.

## Article 10 – Industrial property

All equipment, models, brands, drawings, specifications, assembly instructions, user manuals and other information provided by PLASTUB remain its property at all times.

The customer shall not claim any ownership of equipment, models, drawings, specification and other elements of information. In no event shall the customer use such elements outside the context of the sale agreement.

The customer shall not reproduce or recreate PLASTUB products.

The totality of industrial property rights concerning the results of the execution of the order shall remain the property of PLASTUB, without limit on time nor geographical scope.

## Article 11 – Retention of title

The products are sold under retention of title: transfer of ownership is subject to the full payment of the price by the customer on the agreed due date and notwithstanding the transfer of risk on the date of delivery.

If payment is not made by the due date, PLASTUB shall retake possession of the products remaining in its ownership and at its discretion terminate the agreement by registered letter to the customer.

The customer shall not transform, incorporate or assemble any of the products before paying for them in full.

The customer shall retain the sold products under retention of title to ensure that they are not mixed with similar products originating from other suppliers.

The risks are assumed by the customer from the time of delivery of the products, under the conditions of the agreement and notwithstanding the retention of title.

The customer agrees to insure the products to the benefit of entitled parties against all risks they may encounter or be exposed to from the time of delivery.

The customer shall maintain equipment sold under retention of title in good condition and shall assume all reconditioning costs should the equipment be returned unpaid for.

Should a customer fail to pay for purchased products, PLASTUB shall demand their return at the customer's expense, risk and peril, by registered letter with recorded delivery.

In the event that PLASTUB reclaims the merchandise, it is not obliged to return any advance payments on the price if these amounts can be cancelled out by the compensation due by the customer (for reconditioning costs or repairs).

## Article 12 – Liability – Guarantee – Insurance

The liability of PLASTUB is limited to the repair or standard exchange of products acknowledged as defective, on the condition that they have not been modified, excluding all other indemnities concerning the cost of assembly and machining, delayed supplies etc.

Specific products manufactured according to customer drawings or specifications are not returnable nor exchanged.

Design examples and recommendations are provided for information only. They shall not engage the liability of PLASTUB and shall not constitute an element of performance.

PLASTUB shall not guarantee the harmful consequences of errors in installation, assembly, poor storage or incorrect use. PLASTUB shall not guarantee any damage arising from abnormal use or use not corresponding to the instructions provided in the specifications.

When parts are produced according to customer specifications, the customer is responsible for the information provided and for the suitability of the product with its requirements. PLASTUB declines all liability if the specific products ordered by the customer do not correspond to its needs. PLASTUB shall not be held liable for the design of specific products.

It is the responsibility of the client to inspect the products and ensure their compliance with industry best practices and specific conditions of use. PLASTUB shall accept no product returns without prior authorisation.

PLASTUB delivers its services with all reasonably possible diligence.

PLASTUB shall not be held liable for any indirect harm caused to the customer such as loss of earnings or loss of business.

PLASTUB is insured in accordance with common law.

## Article 13 – Drums

Drum deposits are invoiced at the same time as products delivered, at a set price specified in the price proposal. Subject to the deduction of a fixed fee, the deposits are refunded if the empty drums are returned carriage paid in good condition, within a maximum of three (3) months. After this deadline, PLASTUB may apply a rental fee of 2.5% of the drum price per month.

## Article 14 – Tools and samples

For the creation of tools and any design work not followed by serial production as foreseen in the initial price proposal, the customer may be obliged to pay for the work completed by PLASTUB involving design costs, supplementary tool costs, finalisation and delivery of prototypes.

For parts subject to regular deliveries and to take account of procurement lead times for functional components of tools under the responsibility of PLASTUB, the customer shall inform PLASTUB of the discontinuation of procurement with two (2) months notice. Otherwise, the customer will assume the cost of reimbursing all expenses incurred.

Tools financed by the customer shall remain the property of the customer, who must retrieve them where necessary at its own cost, risk and peril.

## Article 15 – Lengths and tolerances

Lengths invoiced are the lengths actually delivered. When the products originate from specific manufacturing requirements, they may differ from the quantities ordered by 10%, without this entitling the customer to make a claim.

The lengths indicated for our own production include a tolerance of +/- 1%.

## Article 16 – Termination

Termination is subject to a period of two (2) months notice from the date of receipt of the registered letter informing the other party of the termination. Prior to termination, the customer shall settle all outstanding invoices concerning tools and inform PLASTUB of the destiny of the tools (taken back at its costs or destroyed by PLASTUB).

## Article 17 – Competent jurisdictions

Any disputes concerning the interpretation and execution of product sales shall be the sole jurisdiction of the commercial court of Clermont-Ferrand. PLASTUB's legal domicile is its company head office. French law is applicable.

## Article 18 – Returns

When PLASTUB accepts product returns, we may only issue a credit note if they are delivered in perfect condition without sign of use, and after inspection and acceptance by our staff.

## Article 19 – Language

For courtesy reasons, our general terms and conditions of sale are available in English but only the French version is legally binding.
